Our Story

At Dolphin Fiberglass Pools we are committed to producing industry leading Fiberglass Pools for our customers. Our business foundation and philosophy is firmly based on achieving exceptional customer satisfaction at every level. It is our goal to provide quality workmanship using the highest quality material available in the industry.

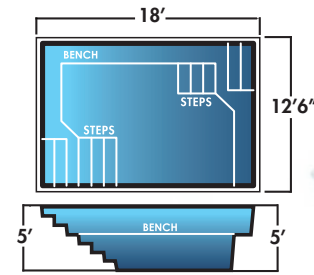

From our new modern production facility located on the 401 between Toronto and Montreal in Trenton, Ontario, we are well positioned to serve our growing dealer network across Canada and the North Eastern US. With solid growth since our inception in 2008 we have seen our product line expand to 26 Pool Models, 5 Spas and now the new Splash Pod Series, all available in 6 vibrant colours.

In keeping with our philosophy to exceed industry standards we provide dealer training to our pool builders and installers on installation methods and best practices.

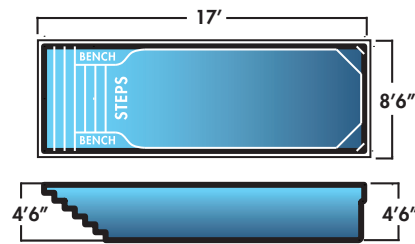

Our commitment is to develop and grow our business through strong enduring relationships with our dealer network and customers.

Sincerely,
Ron & Linda Mitchell

At Dolphin Fiberglass Pools, we utilize the highest quality material available for Fiberglass Pool production. Our Pools are made in accordance with the ANSI / NSPI standards for Flexural Modulus, Flexural Strength, and Shear Strength. Dolphin Fiberglass Pools high tensile strength allows our pool maximum flexibility making them ideal for regions with extreme temperature changes. The smooth seamless vibrant gel coat surface feels great to the touch.

These materials are applied in a systematic method to provide durability and strength. How is a Dolphin Composite Fiberglass pool built?

With every pool the first step in our process involves the precise

application of one of our 6 vibrant ISO-NPG Gelcoat Colours. The next step involves the application of our "Skin Coat" layer which includes a Chopped Fiberglass Roving and Formulated Vinyl Ester Resin Matrix. Next and unique to Dolphin Fiberglass Pools is the use of a dual layer of a knitted Quadaxial Fiberglass Reinforcement. Our laminate build-up continues with another 2 layers of hand applied 24 oz. Woven Roving Fiberglass with a Chopped Fiberglass layer in between to complete the total laminate. One key feature to all Dolphin Composite Fiberglass Pools is our resin system. We do not add any fillers or extenders to our resin systems. This is to insure the maximum physical properties in each pool laminate and it's a commitment that

Dolphin has made from day one.

The Composite Fiberglass Laminate of a Dolphin Fiberglass Pool is strictly monitored and controlled throughout our layup process. Our experienced staff proudly manufacture our pools to meet the demands of our northern climate. Quality checks throughout all stages of our manufacturing process insure we comply with the industry standards and provide the best Fiberglass Pools in the industry.
